

**CRYONOMIC<sup>®</sup> Product Information**  
**\*\*\* New cool equipment from CRYONOMIC \*\*\***

## Release of the CRYONOMIC 7<sup>th</sup> generation blasters:

The new COB 7 Series offers several new advantages compared to COB 6 Series.

The same dry ice machine COB-71 can also work with remote control and can be ordered with abrasive module optionally.

- COB-71** = CRYONOMIC one hose blaster  
has all functionalities of the COB-62plus with
- + larger hopper (30 kg instead of 14 kg)
  - + improved pellet flow system (hopper can vibrate freely)
  - + more robust chassis with removable panels
  - + foldable handle, can be used as hose holder
  - + two large wheels
  - + pellet rate adjustment continuous with LED-display instead of 4 steps
  - can not be equipped to blast with 2-hoses
- COB-71R** = COB-71 with
- + 1-hose gun with remote control MG1004R instead of MG1004
  - + buttons on the control panel for pressure control instead of manual pressure regulator

For remote controlled blasting with the 1-hose system we also release the new gun MG1004R!

**Overview and characteristics of the new CRYONOMIC dry ice blasters:**

The **COB-71** blaster has all the characteristics of the well known CAB blaster and is delivered with our well proven patented self-adjusting airlock of the COB blaster. On top of that, it is pre-equipped for 'dry ice grit blasting' and it is mounted in a complete new design !

**COB-71** (= same powerful dry ice blaster with the same hose and gun like COB-62, with the same low dry ice and compressed air consumption) has all functionalities of the COB-62 but with:

- + larger hopper: 30 kg instead of 20 kg
- + improved pellet flow system (hopper can vibrate freely)
- + more robust chassis with removable panels
- + foldable handle, can be used as hose holder
- + two large rear wheels
- + can blast up to 10 bar with 1-hose gun

For technical details see attached leaflet available in English, German and French.

Remarks:

- The '7' stands for the new design of the 7<sup>th</sup> generation.
- The number '1, 2 and 3' in 71, 72 and 73 indicate the amount of hoses delivered with the blaster:  
71 for 1-hose system
- COB 71-machines are pre-equipped with the Abrasive Module, COB 62 doesn't.
- The **COB-62** is very succesful, and the **COB 71** is even better.

The COB-71 compared to COB-62 is having several advantages like bigger hopper, larger wheels, stronger chassis, better vibrator, is preequiped for abrasive module and the same cleaning power and compressed air requirement is identical.

Chose the COB-71 and your job will be even easier.
